Physics Lab-2 Code: PH-491 Contacts: 3P Credit: 2

Group 1: Experiments on Electricity and Mangentism

- 1. Determination of dielectric constant of a given dielectric material.
- 3. Determination of resistance of ballistic galvanometer by half deflection method and study of variation of logarithmic decrement with series resistance.
- 4. Determination of the thermo-electric power at a certain temperature of the given thermocouple.
- 5. Determination of specific charge (e/m) of electron by J.J. Thomson's method.

Group 2: Quantum Physics

- 6. Determination of Planck's constant using photocell.
- 7. Determination of Lande'g factor using Electron spin resonance spetrometer.
- 8. Determination of Stefan's radiation constant
- 9. Verification of Bohr's atomic orbital theory through Frank-Hertz experiment.
- 10. Determination of Rydberg constant by studying Hydrogen/ Helium spectrum

Group 3: Modern Physics

- 11. Determination of Hall co-efficient of semiconductors.
- 12. Determination of band gap of semiconductors.
- 13. To study current-voltage characteristics, load response, areal characteristics and spectral response of photo voltaic solar cells.
- a) A candidate is required to perform 3 experiments taking one from each group. Initiative should be taken so that most of the Experiments are covered in a college in the distribution mentioned above. Emphasis should be given on the estimation of error in the data taken.
- b) In addition a student should perform one more experiments where he/she will have to transduce the output of any of the above experiments or the experiment mentioned in c] into electrical voltage and collect the data in a computer using phoenix or similar interface.
- c) Innovative experiment: One more experiment designed by the student or the concerned teacher or both.

Note:

- i. Failure to perform each experiment mentioned in b] and c] should be compensated by *two* experiments mentioned in the above list.
- ii. At the end of the semester report should sent to the board of studies regarding experiments, actually performed by the college, mentioned in b] and c]
- iii. Experiment in b] and c] can be coupled and parts of a single experiment.
